*Have fun
preparing for
Christmas*

Easily create a beautiful glossy metallic effect with deco spray by Pebeo.

Eco-system

MADE BY *Elly*

On the left side you can see how to fill the jar/pot. The base is a lot of hydro-granules, than a layer of charcoal (pond filter coal), to keep everything pure and then place a layer of earth for cacti or potting soil for normal plants.

If there is too much moisture in the jar, the glass will batter. Than remove the lid for some time. Don't place the pot in direct sunlight. To decorate use stones, shells, pieces of wood or bark, little branches, statues, dinosaurs .. everything can be used! Use your imagination!

pébéo

Vitrail on sheet

PeBéo Vitrail can easily be used on laminating or transparent sheets. Printed out your favorite design and place it under the transparent sheet. With the Vitrail outliners (cernes relief) you can make the edges and then color the design with the Vitrail paint. This paint gives the appearance of stained-glass paint and is slightly translucent. Allow the creation to dry and then cut it out. Very nice window decorations. But Vitrail can also be applied directly on wood, mdf, cardboard, etc.
